

Introduction

The Lynky Home Intelligence Hub brings all of your smart home devices together into one beautiful, easy-to-use interface. Whether wall-mounted or sitting on your desk, the Lynky hub acts like the universal remote of the smart home, allowing multiple products to be setup, managed and controlled with a simplified, intuitive interface. With Lynky's products, operating many IoT devices at once becomes as effortless as using an everyday appliance in the home.

Multiple Protocol Hotspot

Touch Screen Control

Smart Home Hub

Native Automation Engine

Multiple Voice Assistants

Lynky Home Intelligence Hub

Desktop Version

Screen	5" Touchscreen
Resolution	1280X720
Voice Assistant	Multiple Assistants Available
Microphone	Far-Field Microphone Array
Speaker	2W Stereo Speaker
CPU	Quad-Core Cortex-A7 Processor
System	Customized Linux
Wireless	Wi-Fi/Zigbee/Bluetooth
Size	5.43" X 4.45" X 2.56"
Power Supply	DC5V 2A

The Desktop Version is the easiest way to get started with Lynky. You can place the Home Intelligence Hub in any convenient location in your home near an outlet. The Desktop Edition is powered by USB for even more flexibility.

Wall Version

Screen	5" Touchscreen
Resolution	1280X720
Voice Assistant	Multiple Assistants Available
Microphone	Far-Field Microphone Array
Speaker	2W Stereo Speaker
CPU	Quad-Core Cortex-A7 Processor
System	Customized Linux
Wireless	Wi-Fi/Zigbee/Bluetooth
Size	5.35" X 4.33" X 0.51"
Power Supply	100-240V AC 50/60HZ
Other	Local Lighting Control

The Wall Version replaces an existing single light switch and transforms it into a beautiful smart home control panel. The Home Intelligence Hub lets you control what's connected to that switch with a special double-tap gesture, so you won't lose a light switch in the process.

Lynky Go Accessories

Lynky introduces three new disk-shaped accessories, aimed at bringing even more flexibility to the Lynky system. Go Accessories are small, lightweight Zigbee devices that can easily be set up through the Lynky hub's touchscreen and be used throughout the entire home.

01 Go Button

Go Button functions as an extension of the Lynky Home Intelligence Hub, offering users the ability to manage their gadgets from anywhere in the home—even when they are not near their Lynky hub.

02 Go Sensor

Go Sensor gives homeowners the opportunity to understand their home environment through real-time temperature and humidity reporting on the Lynky hub's touchscreen or Lynky app.

03 Go Security

Go Security is a door and window sensor that provides real-time alerts to homeowners when doors or windows to their homes are opened. Alerts are provided via the Lynky Home Intelligence Hub and Lynky mobile app.

ABOUT LYNKY

The Lynky team came together with a very simple mission: To make the modern smart home truly intelligent, but simple enough for anyone to setup and use. With in-house design, engineering and manufacturing resources, Lynky produces a line of smart home products centered around our Home Intelligence Hub, with best-in-class features and versatility built-in. Lynky's products are thoughtfully designed and work seamlessly with each other, and easily integrate with other smart home devices and systems. With locations in China and the United States, Lynky is simplifying smart homes across the globe.
